

HOW WILL ONLINE LEARNING PREPARE STUDENTS TO BE SUCCESSFUL IN THE DIGITAL ECONOMY?

I. INTRODUCTION

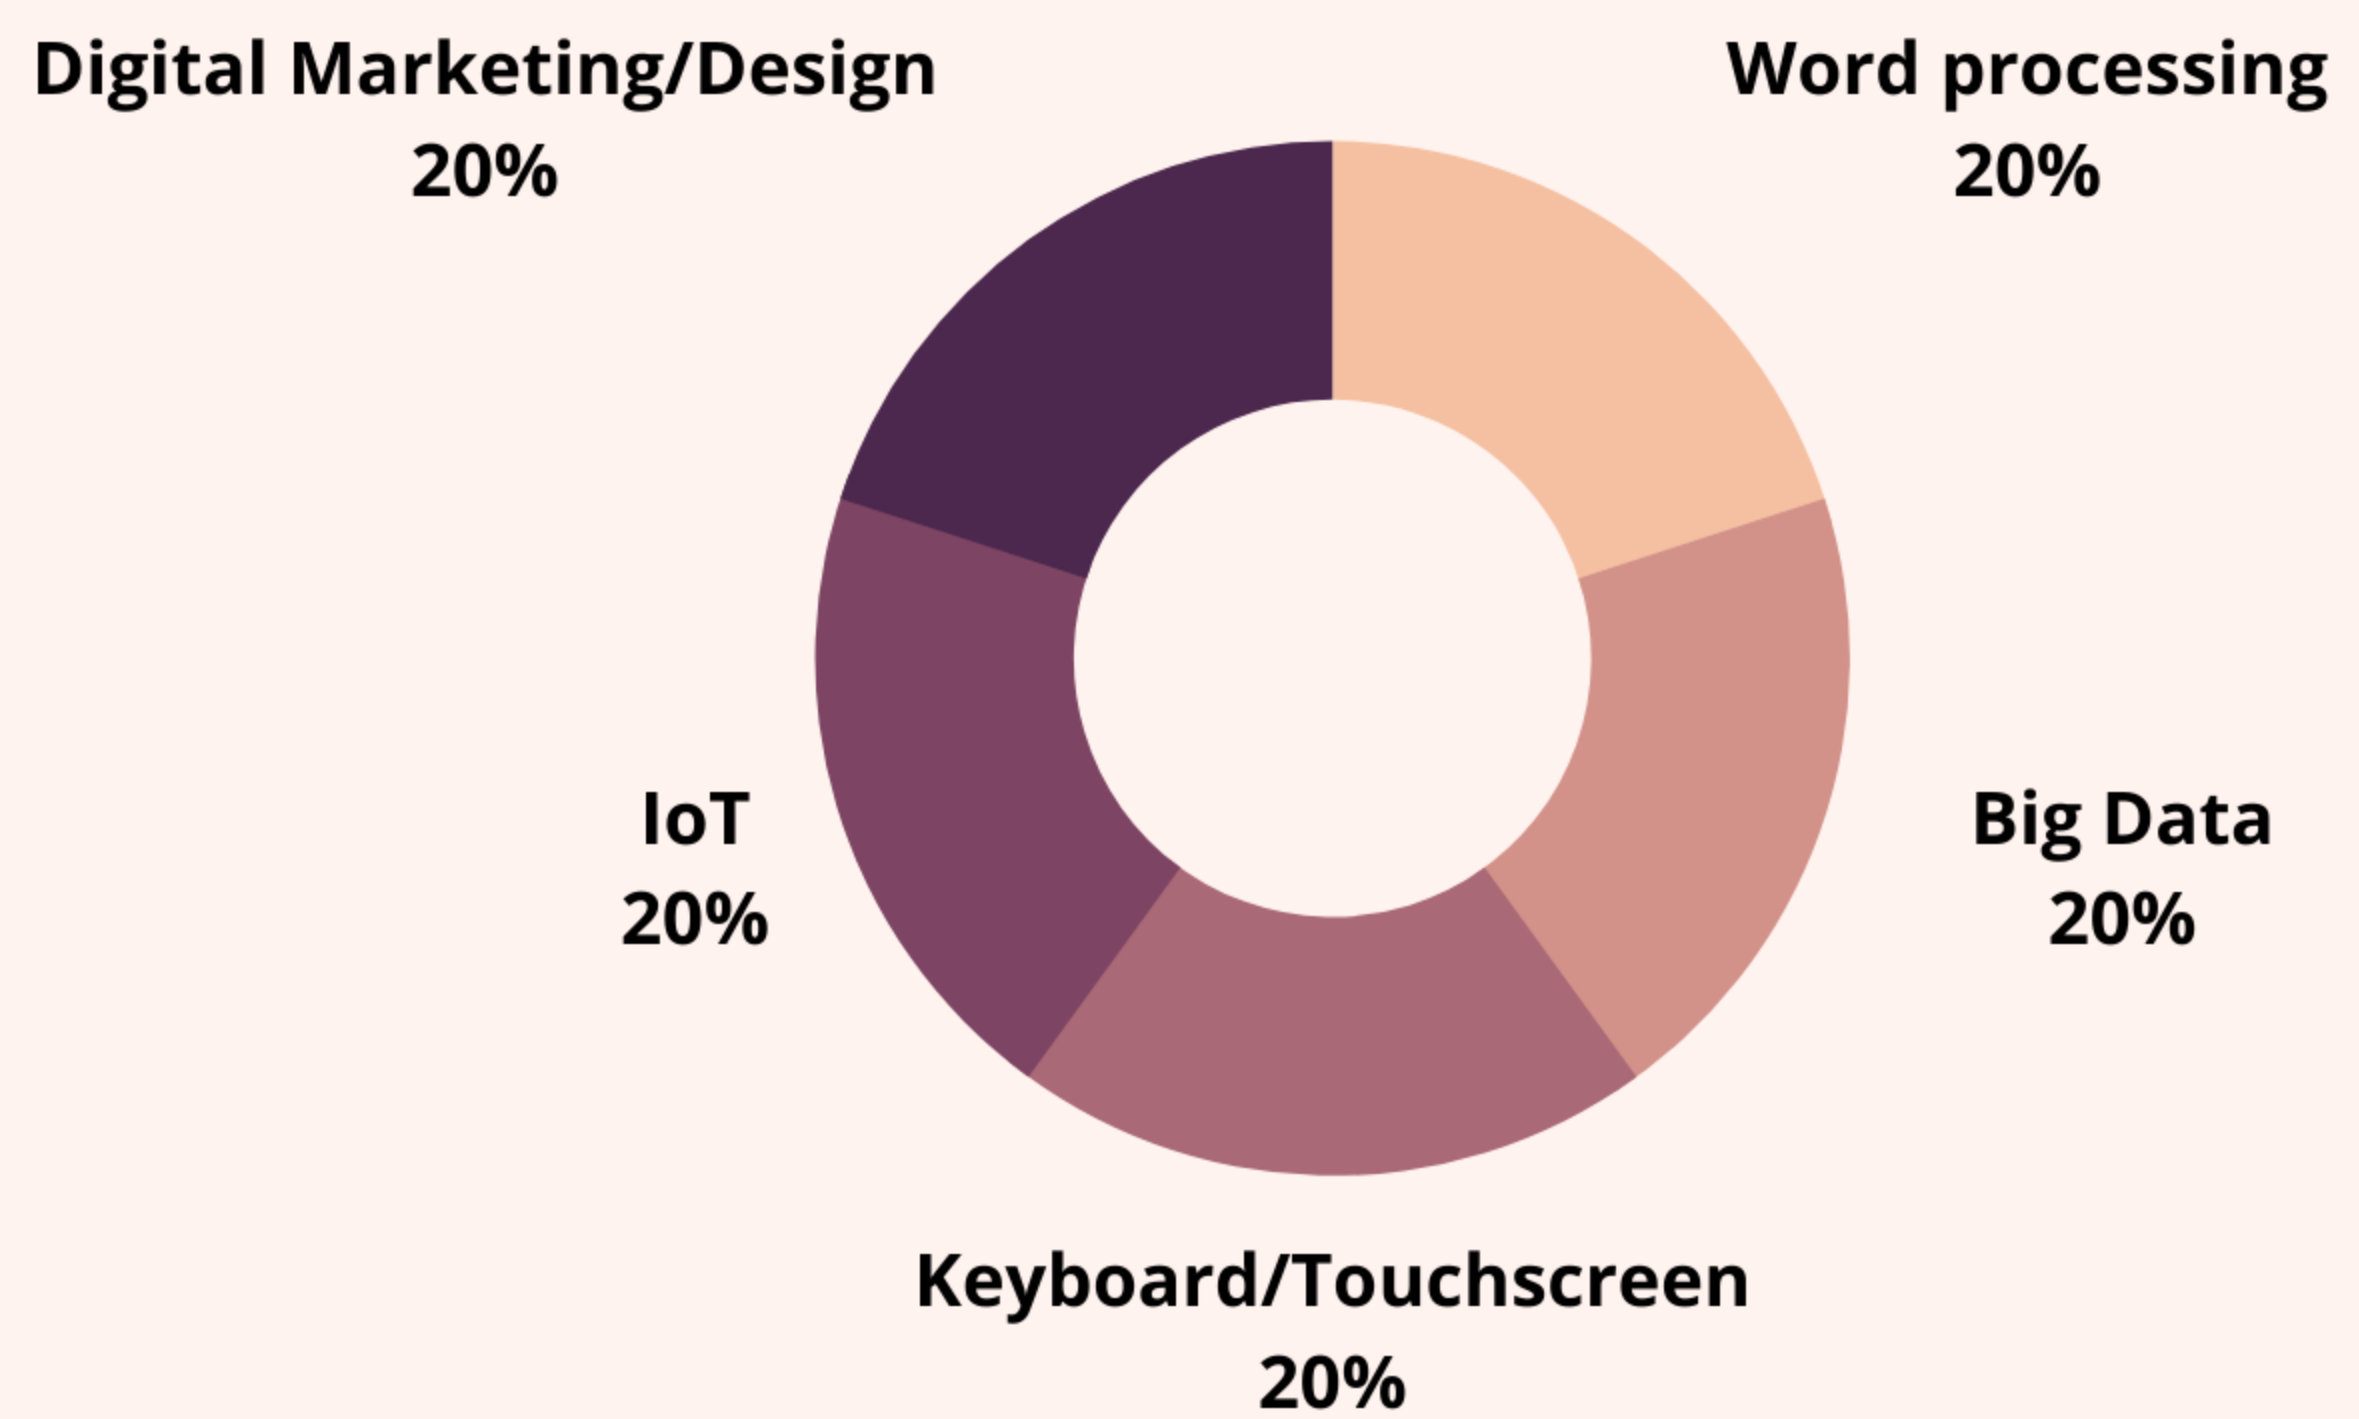

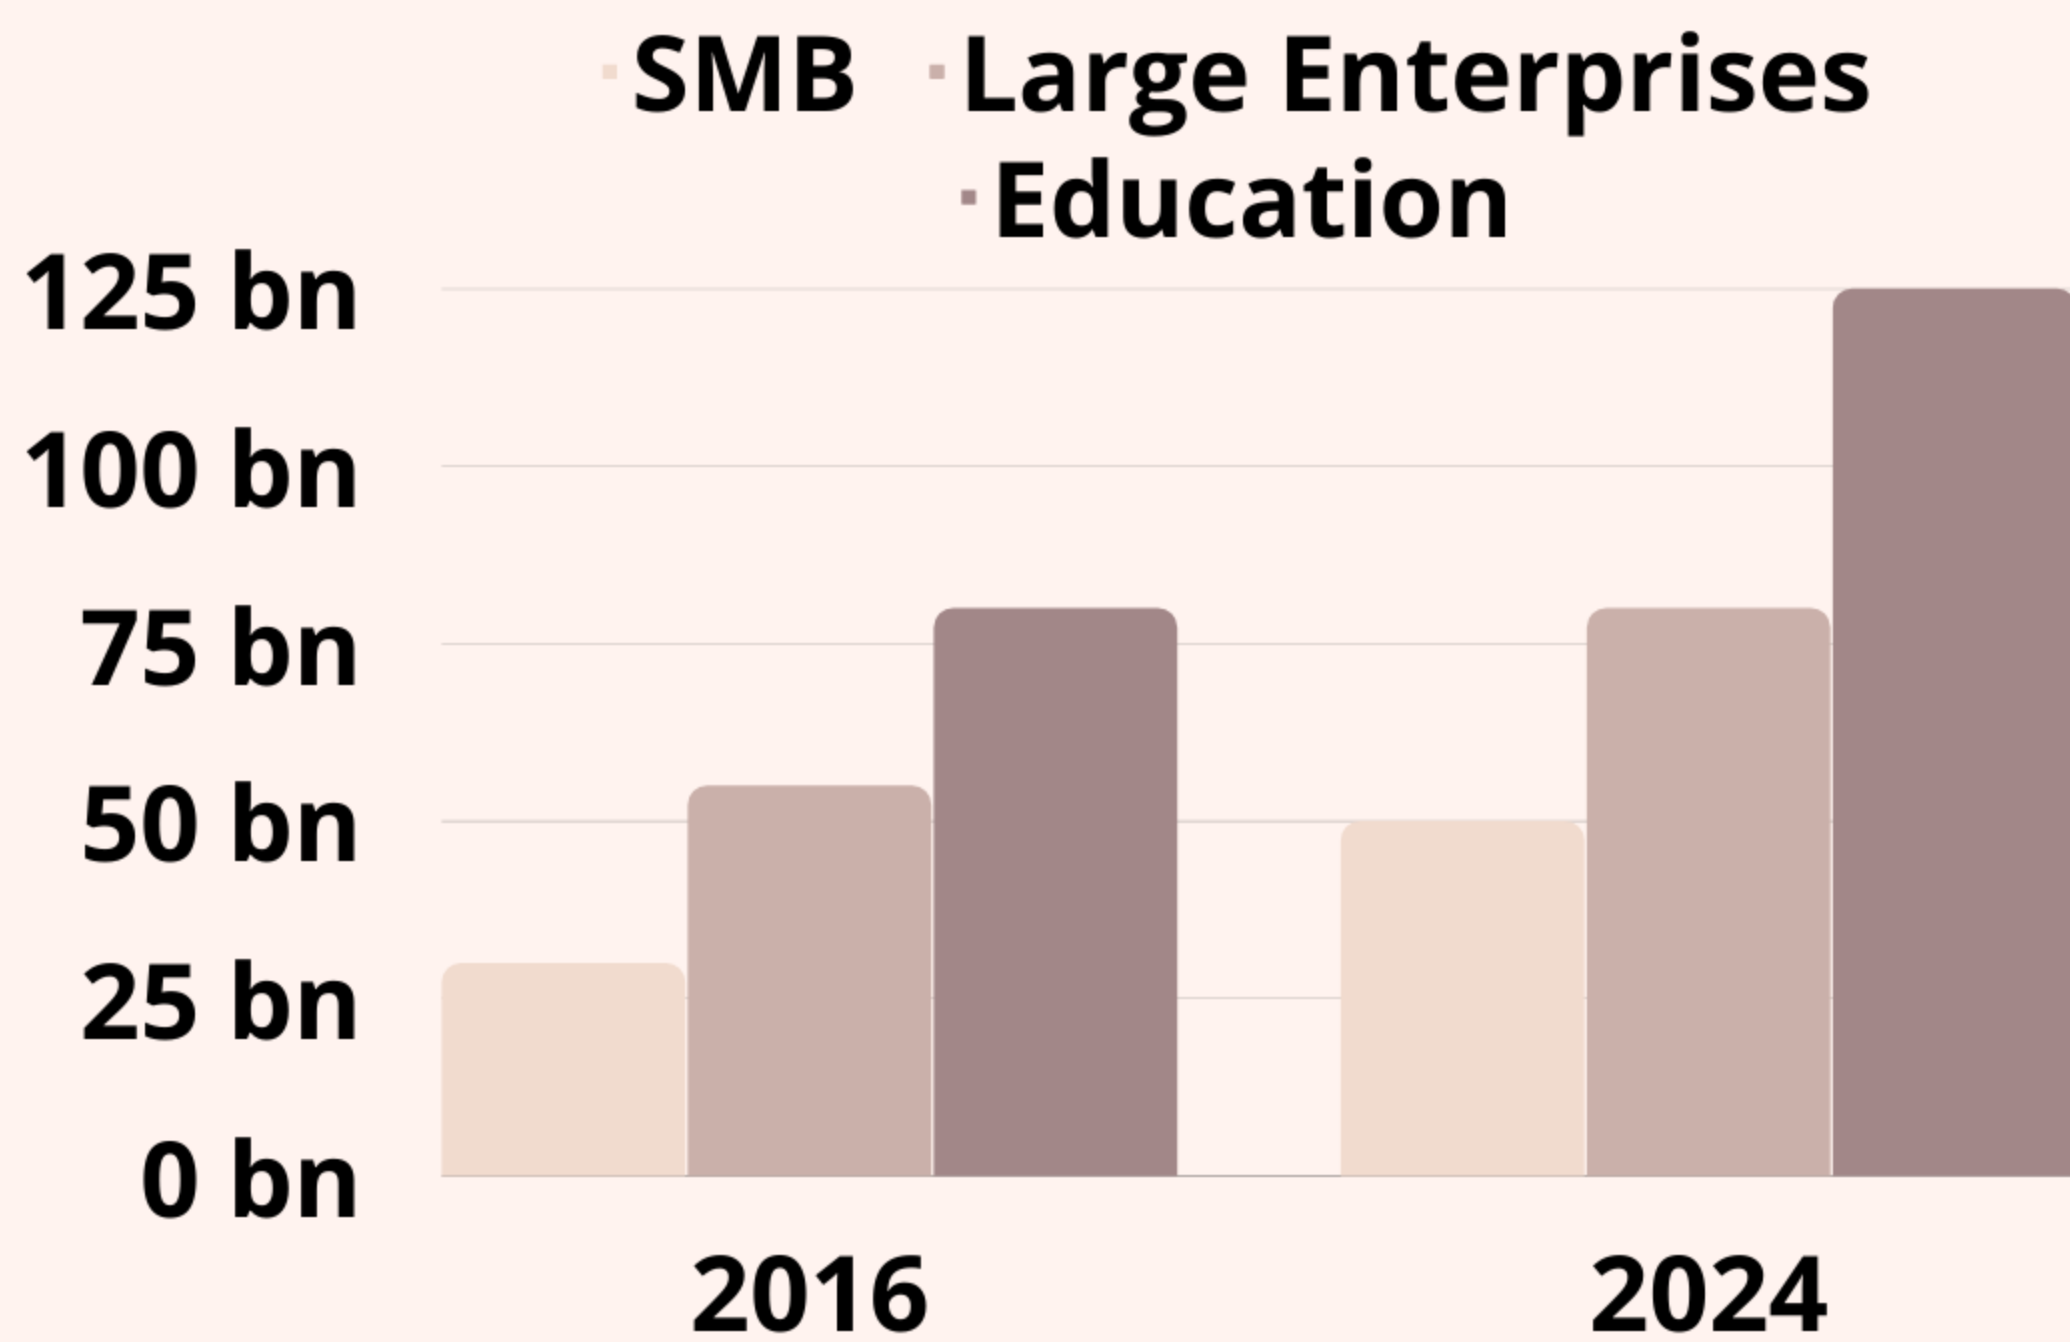

Online learning enables students to develop hard and soft skills which helps them succeed in the digital economy. The expansion and shift of the economy to the digital economy creates many new economic opportunities.

2. METHODS

DATA COLLECTION	DATA ANALYSIS	DATA FINDINGS
SECONDARY SOURCES LIKE JOURNALS, ARTICLES, BOOKS	SWOT ANALYSIS, PESTLE ANALYSIS	COMPARITIVE ANALYSIS

3. KEY FINDINGS

4. RECOMMENDATIONS

- Education, business, and government should collaborate more strategically to develop educational programmes that are more in line with industry demands and improve student entrepreneurial and job results.
- All secondary and postsecondary educational programmes should include -credit experiential learning in digital industries.
- Industries should provide more training, mentoring, peer-to-peer, and on-the-job learning opportunities.
- Implementation of policies which will help education institutes and organisations to adapt to the changing world arising from digital transformation.
